

MYOB EXO Finance – Anywhere

Take control of your business, no matter where you are. MYOB EXO Finance is built to run remotely so that you can easily link remote offices, provide your sales people with mobile access or work from home with full functionality.

Managing from anywhere

MYOB EXO Finance Anywhere comes with software that runs on your server allowing a workstation or notebook to connect via any standard internet connection. This allows the user to work within the MYOB EXO Finance system as if they were in the office. Whether you're at home, travelling, overseas, at the airport or at your other branches and offices all you do is connect and start using MYOB EXO Finance Anywhere. You have access to all the functionality of your business software from wherever it suits you. And with an ever increasing number of wireless hot spots you can connect where you are. With MYOB EXO Finance Anywhere this ability to work where you want is available today.

On the road

Mid-sized business owners are always on the move, visiting customers and suppliers, attending trade shows and events and more often than not taking work home on the weekend. Make your hotel evenings productive to check on today's product arrivals from overseas, sales orders and dispatches see if that long outstanding debts have been paid; or approve invoices for payment from anywhere.

Or for the sales team, a wireless enabled notebook means reps can place orders straight after leaving the customer or even better while interacting with the customer. MYOB EXO Finance simplifies life on the road and enables you to deliver customer service levels that are demanded today.

No matter how remote your business outpost is as long as there is a connection to the Internet your team will be on line to head office, the warehouse and all the information they need.

MYOB EXO Finance Anywhere is the most cost effective way to link to a home office giving you the flexibility to go home rather than stay at the office.

Architecture supports hosted model for MYOB EXO Finance Anywhere software

Multi-Tier Architecture allows better performance by distributed load sharing across multiple Middleware servers catering for large numbers of users and redundancy for hardware failure.
